

PROHIBITION OF SALES TO EEA RETAIL INVESTORS: The Securities are not intended to be offered, sold or otherwise made available to and may not be offered, sold or otherwise made available to any retail investor in the European Economic Area ("**EEA**"). For these purposes, retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU on Markets in Financial Instruments (as may be amended, varied or replaced from time to time) ("**MiFID II**"); (ii) a customer within the meaning of Directive (EU) 2016/97 (the "**Insurance Distribution Directive**"), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in the Prospectus Regulation. Consequently no key information document required by Regulation (EU) No 1286/2014 (the "**PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling such Securities or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

PROHIBITION OF SALES TO UK RETAIL INVESTORS: The Securities are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the United Kingdom ("**UK**"). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 ("**EUWA**"); (ii) a customer within the meaning of the provisions of the Financial Services and Markets Act 2000, as amended (the "**FSMA**") and any rules or regulations made under the FSMA to implement Directive (EU) 2016/97, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or (iii) not a qualified investor as defined in Article 2 of Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA. Consequently no key information document required by Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the "**UK PRIIPs Regulation**") for offering or selling the Securities or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling such Securities or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

1. Liquidity risk arising from potential inability to borrow or access the capital markets on suitably favourable terms (including due to adverse changes in its credit ratings) or to sell its assets. This may also arise from increased liquidity costs. CS relies significantly on its deposit base for funding, which may not continue to be a stable source of funding over time.
2. Risks arising from the suspension and ongoing liquidation of certain supply chain finance funds and the failure of a US-based hedge fund to meet its margin commitments (and CS's exit from its positions relating thereto), in respect of which a number of regulatory and other inquiries, investigations and actions have been initiated or are being considered. In addition, there are risks arising from the impact of market fluctuations and volatility on CS's investment activities (against which its hedging strategies may not prove effective). The spread of COVID-19 and resulting government controls and containment measures implemented around the world have caused severe disruption to global supply chains, labour markets and economic activity, which have contributed to rising inflationary pressure and a spike in market volatility. The withdrawal of emergency monetary policies and liquidity support measures put in place by central banks during earlier stages of the COVID-19 pandemic may negatively affect economic growth and adversely effect CS's businesses, operations and financial performance. The spread of COVID-19 is continuing to have an adverse impact on the global economy, the severity and duration of which is difficult to predict. The COVID-19 pandemic has significantly impacted, and may continue to adversely affect, CS's credit loss estimates, mark-to-market losses, trading revenues, net interest income and potential goodwill assessments, and may also adversely affect CS's ability to successfully realise its strategic objectives and goals. CS is also exposed to other unfavourable economic, monetary, political, legal, regulatory and other developments in the countries in which it operates (as well as countries in which CS does not currently conduct business), including the escalating conflict between Russia and Ukraine, as a result of which the United States, European Union, United Kingdom and other countries have imposed, and may further impose, financial and economic sanctions and export controls targeting certain Russian entities and/or individuals (such that CS may face restrictions (including any Russian countermeasures) on engaging with certain consumer and/or institutional businesses), and which could lead to regional and/or global instability, as well as adversely affect commodity and other financial markets or economic conditions. In addition, there are uncertainties regarding the discontinuation of benchmark rates. CS's significant positions in the real estate sector, and other large and concentrated positions, can also expose it to larger losses. Many of these market risk

factors, including the impact of COVID-19, may increase other risks, including CS's credit risk exposures, which exist across a large variety of transactions and counterparties and in respect of which it may have inaccurate or incomplete information. These are exacerbated by adverse economic conditions and market volatility, including as a result of any defaults by large financial institutions (or any concerns relating thereto).

3. CS's ability to implement its current strategy which is based on a number of key assumptions, is subject to various factors outside its control, including market and economic conditions and changes in law. The implementation of CS's strategy may increase its exposure to certain risks, including credit risks, market risks, operational risks and regulatory risks. CS's exit from certain businesses and expansion of its products, such as sustainable investment and financing offerings, may have unanticipated negative effects in other areas of its business and may result in an adverse effect on CS's business as a whole. The implementation of CS's strategy relating to acquisitions and other similar transactions subjects it to the risk that it may assume unanticipated liabilities (including legal and compliance issues), as well as difficulties relating to the integration of acquired businesses into its existing operations.
4. Country, regional and political risk in the regions in which CS has clients or counterparties, which may affect their ability to perform their obligations to CS. In part because an element of CS's strategy is to increase CS's wealth management businesses in emerging market countries, it may face increased exposure to economic, financial and political disruptions in those countries, which could result in significant losses. Related fluctuations in exchange rates for currencies (particularly for the US dollar) may also adversely affect CS.
5. A wide variety of operational risks arising from inadequate or failed internal processes, people, systems or from external events, including breaches of cyber-security and other failures of information technology. CS relies heavily on financial, accounting and other data processing systems, which are varied and complex, and may face additional technology risks due to the global nature of its operations. CS is thereby exposed to risks arising from human error, negligence, employee misconduct (including errors in judgement, fraud, malice, and/or engaging in violations of applicable laws, rules, policies or procedures), accidental technology failure, cyber-attack and information or security breaches. This also exposes CS to risk from non-compliance with existing policies or regulations. Protecting against threats to CS's cyber- security and data protection systems requires significant financial and human resources. Cybersecurity risks have also significantly increased in recent years in part due to the growing number and increasingly sophisticated activities of malicious cyber actors. The ongoing global COVID-19 pandemic has increased the vulnerability and likelihood of damage to CS's information technology systems as a result of a cybersecurity incident because of the wide-scale and prolonged shift to remote working for CS's employees and the increased reliance by CS's customers on remote (digital) banking services. CS's existing risk management procedures and policies may not be fully effective in mitigating its risk exposures in all economic market environments or against all types of risk, including risks that CS fails to identify, anticipate or mitigate, in whole or in part, which may result in unexpected, material losses. In addition, inadequacies or lapses in CS's risk management procedures, policies, tools, metrics and modelling can require significant resources and time to remediate, lead to non-compliance with laws, rules and regulations and attract heightened regulatory scrutiny, exposing CS to regulatory investigations or legal proceedings and subjecting it to litigation or regulatory fines, penalties or other sanctions, or capital surcharges or add-ons, as well as reputational damage. Moreover, CS's actual results may differ materially from its estimates and valuations, which are based upon judgement and available information and rely on predictive models and processes. The same is true of CS's accounting treatment of off- balance sheet entities, including special purpose entities, which requires it to exercise significant management judgement in applying accounting standards; these standards (and their interpretation) have changed and may continue to change. In addition, physical and transition climate risks could have a financial impact on CS either directly, through its physical assets, costs and operations, or indirectly, through its financial relationships with its clients. Given the growing volume of nascent climate and sustainability-related laws, rules and regulations, increasing demand from various stakeholders for environmentally sustainable products and services and regulatory scrutiny, CS may be subject to increasing litigation, enforcement and contract liability risks in connection with climate change, environmental degradation and other environmental social and governance related issues.
6. CS's exposure to legal risks is significant and difficult to predict and the volume and amount of damages claimed in litigation, regulatory proceedings and other adversarial proceedings against financial services firms continues to increase in many of the principal markets in which CS operates. CS's business is highly regulated, and existing, new or changed laws, rules and regulations (including in relation to sanctions) and monetary policy applicable to CS (as well as regulations and changes in enforcement practices applicable to its clients) may adversely affect its business and ability to execute its strategic plans and increase costs, as well as impact the demand from clients for CS's services. Moreover, CS's ability to attract and retain customers, clients, investors and employees, and conduct business transactions with its counterparties, could be adversely affected to the extent its reputation is damaged, which could arise from various sources, including if its procedures and controls fail (or appear to fail). In addition, Swiss resolution proceedings may affect CS's shareholders and creditors.
7. CS faces intense competition in all financial services markets, which has increased as a result of consolidation, as well as new and emerging technologies (including trends towards direct access to automated and electronic markets, robo-advising, digital assets and the move to more automated trading platforms). New technologies, such as cryptocurrency and blockchain, may disrupt the financial services industry and require CS to commit further resources to adapt its products and services. In this highly competitive environment, CS's performance is affected by its ability to recruit and retain highly skilled employees.

What are the key risks that are specific to the Securities?
<ol style="list-style-type: none"> Risks in case of an insolvency of the Issuer. An investment in the Securities constitutes unsecured obligations of the Issuer and will not be covered by any statutory or other deposit protection scheme and does not have the benefit of any guarantee. Therefore in the event of the insolvency of the Issuer, an investor in the Securities may lose all or some of its investment therein irrespective of any favourable development of the other value determining factors. Risks in connection with FINMA's broad statutory powers in relation to Credit Suisse. Rights of the holders of the Securities may be adversely affected by the Swiss Financial Market Supervisory Authority FINMA's broad statutory powers in the case of a restructuring proceeding in relation to Credit Suisse, including its power to convert the Securities into equity and/or partially or fully write-down the Securities. Potential loss of some or all of the investment. If the Securities are sold in the secondary market for less than the purchase price paid by the relevant investor, investors could lose some or all of their investment. Risks in connection with early redemption of the Securities. The Securities may be redeemed prior to their scheduled maturity in certain circumstances, including: following the occurrence of an event of default or for illegality reasons or following certain events affecting the Issuer's hedging arrangements. In such circumstances, investors may be unable to reinvest the proceeds in an investment having a comparable return. In certain circumstances, the Issuer may adjust the terms of the Securities and such adjustment may have a negative effect on the value of the Securities. Subject to the terms and conditions of the Securities, if the Issuer determines that any adjustment events, additional disruption events or other events affecting the Issuer's hedging arrangements or the cost to the Issuer of performing its obligations under the Securities have occurred or if certain events affecting the Issuer's ability to make payments have occurred, the Issuer may adjust the terms and conditions of the Securities without the consent of the Securityholders. Any such adjustment could have a material adverse effect on the return on, and value of, the Securities. Fixed Rate Securities. As the Securities bear interest at a fixed rate, subsequent changes in market interest rates may adversely affect the value of the Securities. Risks in connection with the secondary market. The secondary market for the Securities may be limited, may never develop at all or may not continue even though the Securities are listed, which may adversely impact the market value of such Securities or the ability of the investor thereof to sell such Securities. In addition, the market value of the Securities will be affected by factors beyond the control of the Issuer, such as the creditworthiness of the Issuer, the remaining time to maturity of the Securities, interest and yield rates, and national and international events. The issue price of the Securities may be more than the price at which it is possible to sell such Securities in the secondary market, as the issue price may take into account fees, commissions or other amounts relating to the issue and distribution of the Securities and the hedging activities of the Issuer. Exchange rate risks in connection with the Securities. Investors may be exposed to currency risks where the Securities are denominated in currencies other than the currency of the country in which the investor is resident. In case of an unfavourable development in those currencies, the value of the Securities to the investor may decrease.
